

# Evaluate Outcomes

## Wounds Prevention and Management Cycle

### Tip Sheet

## Evaluate Outcomes

Determine that the goals have been met, partially met, or unmet.

- If the goals have been met:
  - Ensure that there is a sustainability plan in place.
  - Continue with treatment and care plan.
  - Determine when to re-evaluate.
- If the goals are partially met:
  - Re-assess the client, environment and healthcare system factors.
  - Modify the plan of care and/or treatment plan to optimize any factors impairing healing or other goals.
  - Ensure that there is a sustainability plan in place.
- If the goals are unmet:
  - Re-assess the client, environment and health care system factors to:
    - Ensure correct identification of etiology.
    - Identify any client, environment and health care system factors that can be optimized.
  - Re-evaluate the goals of care, and consider modifying the goals.
